

Iron & Sulfur Filtration System

Reliant Filtration System

- Metered electronic control
- LCD display
- Easy program
- Unlimited powerout backup
- Diagnostics
- Day override

The Reliant warranty includes:

- One year on media
- Five years on control valve
- Lifetime on tank

**See warranty for complete details.*

Until now, the most common solution for problem water involved harsh chemicals – a classic case of the cure being as bad as the disease! Now there is a new solution, a proven technology, the Reliant. The Reliant Sulfur and Iron Filtration Systems use a chemical-free Air Induction Filter to clean the water without harsh chemicals.

Engineered & Installed for Lasting Performance

The Reliant Sulfur and Iron Filtration Systems are designed for high performance, long life and trouble-free operation and maintenance. All the components can be easily removed for efficient maintenance or replacement, even if your first service need is years away.

- Removes iron and odor from well water
- Metered system – regenerates based on usage
- Patented Vortech™ technology extends life and performance of media bed
- Exclusive component repair program
- Exclusive media exchange module
- 1" high flow design
- No fasteners, screws, nuts or bolts to corrode
- Operated by a single motor driven piston
- Seamless fiberglass wrapped resin tank

Reliant Control Valve

Using the O in H2O

Sophisticated, yet surprisingly simple, the Reliant Sulfur and Iron Filtration Systems are natural oxidation technology. Well water cycles through the Reliant where air – and its O₂ – oxidizes the iron and sulfur without chemicals, without air compressors or aerators! This unique patented technology is equally efficient in managing heavy iron and sulfur water.
